

SERVICE FOR ALL YOUR VIBRATORY FEEDING EQUIPMENT

“Jerhen Industries is committed to keeping your equipment running at peak performance, keeping your time and budget in mind at all times.”

Regardless of the manufacturer, Jerhen Industries is equipped to tune, repair, and optimize your vibratory equipment on-site, without disrupting your daily operations. Our service van is stocked with all the common spare parts and tools - including a portable welder. We are prepared to address the challenges your equipment may present*. We recommend bi-annual evaluations to detect small problems before they become costly repairs.

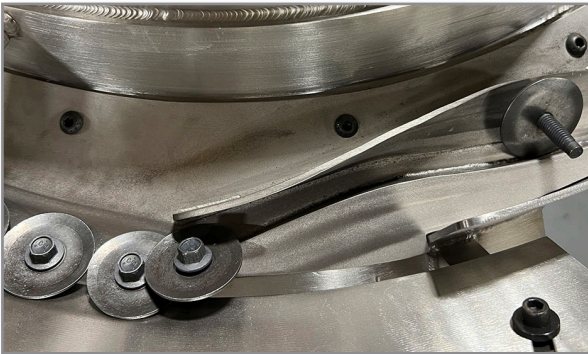

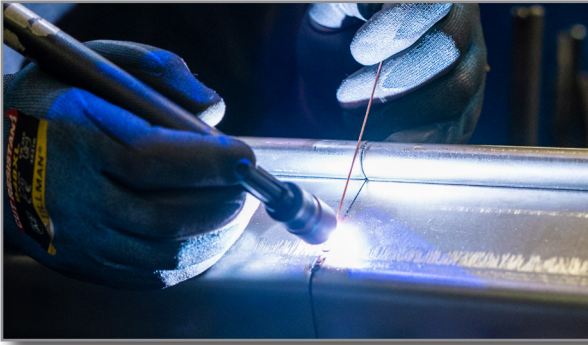

* Realistically speaking, there may be a chance your equipment will need more than a service van and a top-notch technician. In which case, we perform a full evaluation and provide a quote of recommended service.

ON-SITE SERVICES

- **Equipment evaluation.** Create a baseline and prioritize any maintenance.
- **Drive tuning.** Regular tune-ups will extend the life of both the drive and the bowl.
- **Part replacement.** Drive parts, including coils, springs, spacers, and air-jets are stocked in the van. Custom or special order parts need to be ordered prior to our visit.
- **Component repair.** As well as having all the right tools in our service van, we also carry a 110v portable welder to build up worn tooling, mend broken cross-arms, and repair minor cracks.
- **Share opportunities for improvement.** After seeing your equipment in action, we want you to be aware that there might be a better way.

BENEFITS OF CHOOSING JERHEN

- 1. Immediate Troubleshooting and Repairs:** Our technicians swiftly diagnose and resolve issues on-site, minimizing downtime and ensuring smooth production. Detailed documentation is maintained for future reference.
- 2. Tailored service:** On-site visits allow us to fully understand the requirements of your equipment which leads to better communication and solutions.
- 3. Cost Efficiencies:** Regular on-site visits can catch minor issues early, reducing unexpected breakdowns and extending equipment lifespan, leading to long term cost savings.
- 4. Hands-On Training:** Jerhen Industries technicians can provide hands-on training for your operators and maintenance personnel, ensuring that they are educated on operating and maintaining your equipment.
- 5. Customization and Optimization:** Our technicians can make real-time adjustments and optimizations based on the actual operating conditions, leading to improved efficiency and performance.

GENERATIONS OF COMMITMENT

For over 50 years our products have put the right parts, in the right place, at the right time. Our customers trust our proven solutions for around-the-clock reliability and accuracy. We proudly claim Made In America and support all our equipment with on-site service. We encourage the next generation of skilled tradespeople through our participation in educational advisory boards, funding student facilities improvements, and providing paid internships and scholarships.
